**SARGENT AND GREENLEAF PARTNERS WITH SKYCREEK TO PROVIDE
INTERACTIVE VOICE RESPONSE SERVICES FOR A-SERIES™ ATM
ACCESS MANAGEMENT SYSTEM**

INDIANAPOLIS – June 27, 2008 – Sargent and Greenleaf, a member of the Stanley Security Solutions Group and a subsidiary of Stanley Security Solutions, Inc., a provider of integrated access control and security solutions, announced today, a new partnership with SkyCreek Corporation in which SkyCreek will provide interactive voice response (IVR) services for the Sargent and Greenleaf® A-Series™ ATM Access Management System.

The SkyCreek partnership is designed to help Sargent and Greenleaf enhance and streamline the ATM access control process for cash-in-transit (CIT) company field technicians, banks and service organizations who service ATM machines that use the Sargent and Greenleaf® A-Series™ ATM Access Management System. The SkyCreek automated IVR service is available in multiple languages for companies with a presence in international markets.

The A-Series™ ATM Access Management System is designed for secure ATM access management. The system's PC software generates single-use lock codes for users who perform cash replenishment and maintenance on ATMs. All Sargent and Greenleaf® A-Series™ ATM locks require three levels of authorization from field staff to open the ATM lock, including a PIN, Dallas® iButton™ Touch Memory Key and a one-time use code, which is valid once within a defined time interval. This one-time use code is typically delivered by the CIT company's dispatcher. SkyCreek IVR enables the ATM service technician, once successfully authenticated in the system, to receive the one-time use code via interactive voice response. The code can also be transmitted as a text message to the user's cell phone.

Designed to be a turnkey solution customized to the operation's workflow, this IVR service automates upwards of 95 percent of OTC-related field calls to the dispatch center of a leading service provider.

"StanleySargent and Greenleaf chose SkyCreek as the recommended IVR partner in response to the many requests for IVR code capability with A-Series™ ATM locks," said Phil Pitt, marketing director, Sargent and Greenleaf. "A-Series™ customers now can enjoy a fully automated IVR solution that is cost-effective, secure, scalable and customized to work with our A-Series™ products."

Interested customers can contact Stanley/Sargent and Greenleaf or SkyCreek Corporation for more details.

About SkyCreek Corporation

SkyCreek provides enterprise-class customer contact and operational support solutions to large and medium-sized organizations. SkyCreek applications have been demonstrated to improve service performance levels, decrease cost and drive increased revenue.
