STANLEY SECURITY SOLUTIONS INTRODUCES SERIES 500 REVOLVING DOOR

Cost-effective, energy-efficient manual revolving door well-suited for wide variety of applications

FARMINGTON, CT, February 4, 2008 –Stanley Access Technologies, a member of the Stanley Security Solutions Product Group and a provider of access control and integrated security solutions, today announced the release of the Series 500 Revolving Door, a new manual revolving door. The Series 500 Revolving Door is a cost-effective, energy-efficient access solution intended for use in commercial, educational, and institutional facilities. Optimized for application flexibility, the Series 500 revolving door can be used in a wide array of access situations.

The Stanley Access Technologies Series 500 Revolving Door helps improve energy efficiency in buildings, and increases interior comfort by reducing infiltration of dust and dirt through the building entrance. Designed for applications in facilities including office buildings, restaurants, schools and banks, the surface-mounted lower bearing and collapsing mechanism of the Series 500 Revolving Door ensures many years of trouble-free service.

“We’re excited to add the Series 500 Revolving Door to our lineup, giving customers a high-quality, affordable and versatile solution that can meet the demanding needs of high-traffic environments,” said Thom Cordeiro, product manager, Stanley Access Technologies. “This introduction is part of our continuing expansion of our product line, enabling Stanley to offer customers a full spectrum of revolving door products, from manual to automatic.”

Stanley Access Technologies Series 500 Revolving Door features and options include:
