focus on:
integrated security

1 **NT500™ v3.1 Security Management System by Stanley**

Stanley Security Solutions' NT500 v3.1 Security Management System offers a family of options that combine standalone lock hardware with intuitive software. The NT500 v3.1 is an adaptable system. A mechanical system augmented with intelligent access control, the NT500 v3.1 does not require a team of IT experts to install and operate the product.

The NT500 v3.1 delivers an identification and badging feature, supports industry standard ID card technologies, and has image compression and enhancements to provide personnel with high resolution pictures on ID badges.
