STANLEY
Security

**YOUR TRUSTED PARTNER FOR SECURITY
AROUND THE GLOBE**

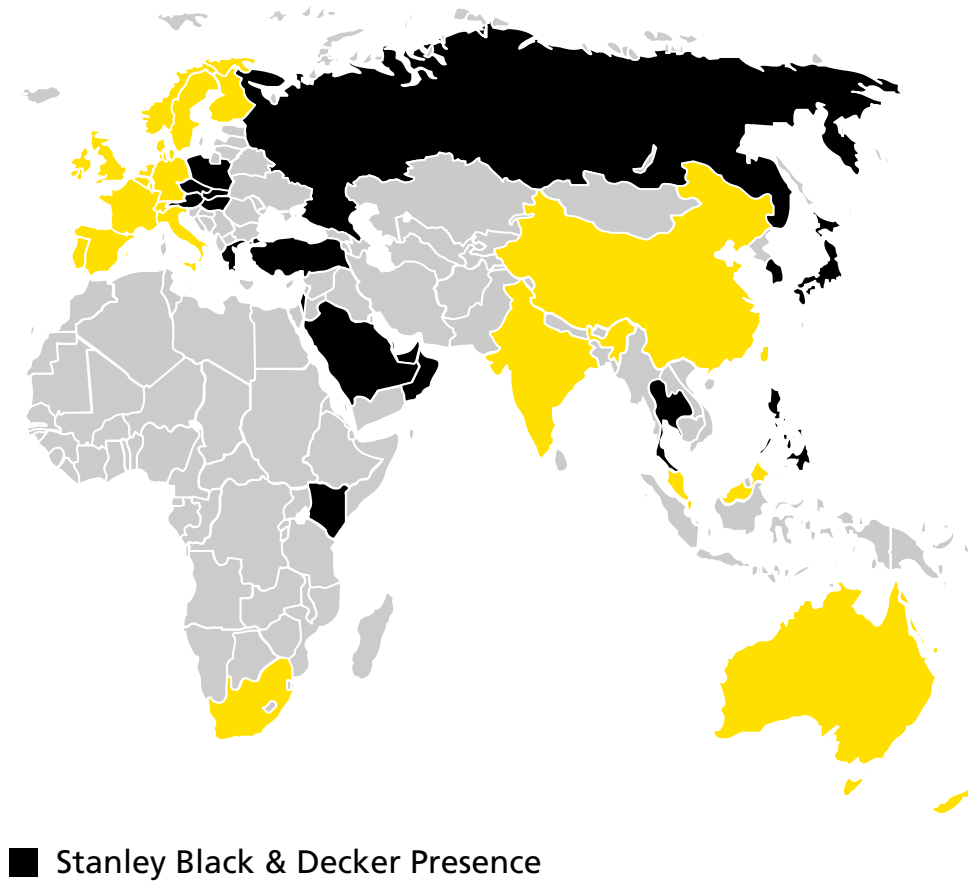

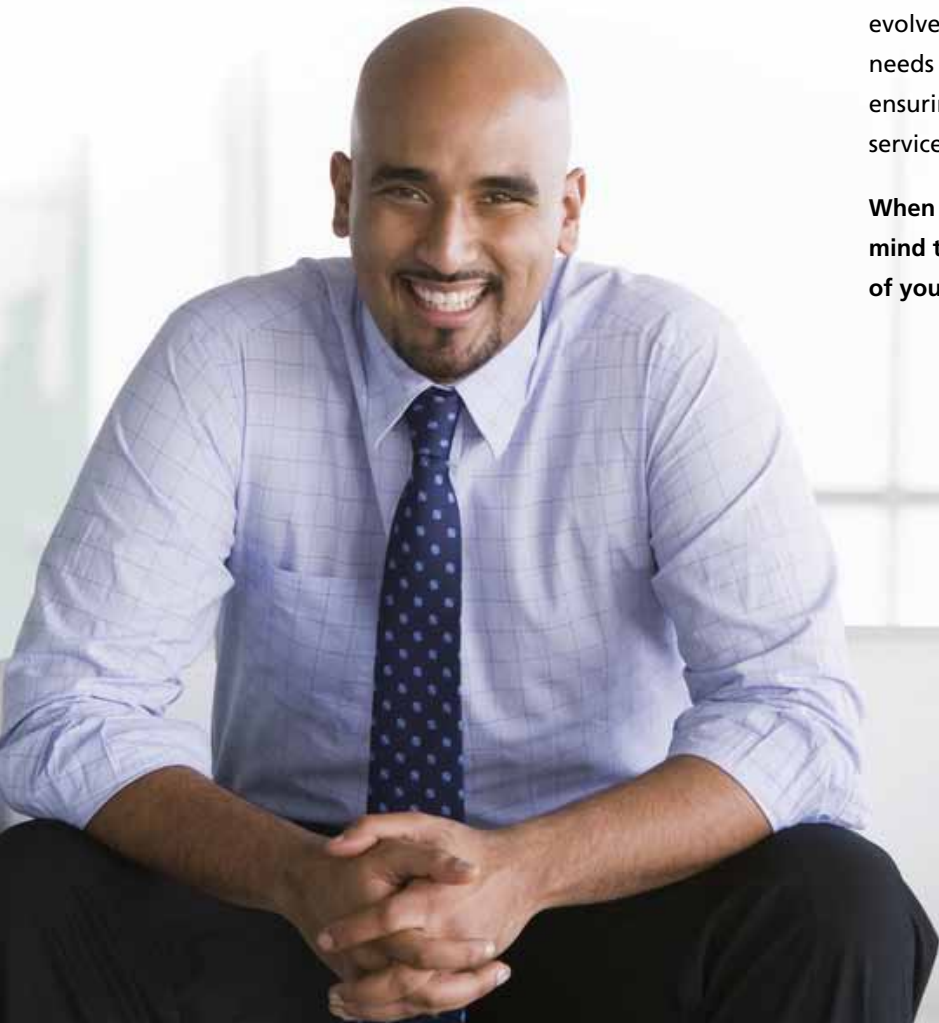

The world of security is continually changing. Security requirements are increasingly demanding and systems are becoming more complex. As a result, today's security environment has become a balance of protection and convenience, state of the art technology and user-friendly operations, and the efficiency of a system as well as the ability to maintain it.

The STANLEY global accounts program is designed to respond to the challenges that come with global accounts in a superior and more efficient way. By integrating the strengths of our STANLEY Security products and services, and our global partners, and leveraging our nearly 1,000 Stanley Black & Decker locations in over 60 countries, we are ready to partner with you in every area of your security needs.

STANLEY Security partners with the industry's leading product suppliers and manufacturers to implement a world-class integrated solution for your facilities. Armed with innovative products and a global program management team, STANLEY offers a total security solution that meets your organization's ever changing security needs, near or far.

STANLEY never forgets what matters most. Our primary focus is making your job easier as your security needs evolve. Our dedication to understanding your unique needs is readily apparent in everything we do, from ensuring on-time installation, to providing outstanding service long after contracts are signed.

When you partner with STANLEY, you will enjoy peace of mind that comes from having one superior source for all of your global security needs.

TECHNOLOGIES & PRODUCTS

EyeLock Iris Biometrics
Revolutionary EyeLock Iris Identity authentication captures iris code data at a distance while in motion, providing the most advanced, cost effective, and efficient biometric identity authentication system available.

AeroScout RTLS
AeroScout Real Time Locating System uses existing Wi-Fi network to provide complete enterprise visibility over a single unified solution, combining a wide variety of location, status, and condition information about valuable mobile assets.

PACOM Integrated Solutions
Intelligent security systems help customers realize the true value of networked security solutions and efficiently integrates access, intrusion, video, and other services.

STANLEY PAC Access Control
PAC Access Control offers innovative and affordable access control products compatible with ReadyKey and enabling the maintenance or migration of an existing installation.

Sonitrol Audio Intrusion
Sonitrol Audio Verified Intrusion systems provide the monitoring center valuable audio information when an alarm is activated. With wall to wall, and floor to ceiling volumetric protection, Sonitrol intrusion detection reduces false alarms and provides valuable insight to law enforcement.

Sargent & Greenleaf Locks
Sargent & Greenleaf manufactures and distributes electronic and mechanical combination, single or dual control, audit, one-time code, time delay, duress output, and remote managed IP modules and locks for a variety of applications.

STANLEY Access Technologies
Automated sliding and swinging entrances offer convenient, controlled ingress and egress for both interior and exterior applications. Manual ICU/CCU door product line and available options offer a complete healthcare entrance solution. Specialized ballistic/blast resistant doors and security revolvers are available for high-risk facilities.

Global Specification Writing
STANLEY Security supports architects, owners, and engineers with preparation of construction documents for mechanical access systems, automatic entrances, and security systems for both new construction and retrofit projects.
