

HSPD-12 / FICAM Consultative and Design Services by STANLEY Security

STANLEY Security is the ideal partner for setting and maintaining high standards of security for your government facility. Our goal is to provide our government customers with the highest level of expertise and services when it comes to both Federal and Local compliance. HSPD-12 and FICAM are driving forces behind access control upgrades in the U.S. Government today. STANLEY Security maintains an expert level staff actively participating in industry groups such as SIA (Security Industry Association) and SCA (Smart Card Alliance), as well as other government groups including the GSA Sponsored Evaluation Program Technical Working Group (EPTWG) and the Government Smart Card Interagency Advisory Board.

STANLEY Security's dedicated Government team has security consultants, system architects, and engineers specially trained and available to assist agencies with HSPD-12 and FICAM compliance, and with security architecture design road maps designed to minimize waste and maximize federal policy compliance.
