Powered by Viakoo

# Complexity Leads to Downtime

Today's modern physical security systems are more complex than ever – with an array of components and processes developed by multiple providers, distributed across numerous locations. An issue or problem at any point in this complex system can lead to:

- System downtime or degraded performance
- Cybersecurity vulnerabilities
- Missed KPIs / Audit non-compliance

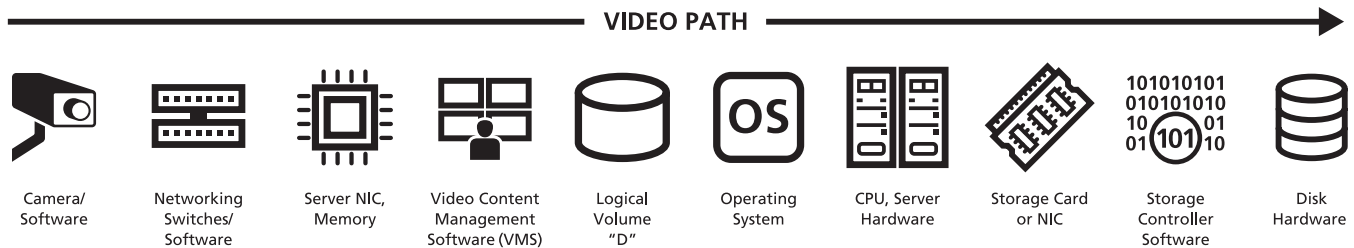

## Intelligent Service Assurance

STANLEY IntelAssure™, Powered by Viakoo, is the first and only service-assurance solution for physical security systems on the market today that utilizes automation to continuously detect and diagnose problems and recommend solutions, leading to:

- ▶ Increased Service Assurance (Uptime) for Video and Other Physical Security Systems
- ▶ Sustainable Cyber Hygiene
- ▶ Audit Compliance Automation

### How It Works

**AUTOMATIC DETECTION:** STANLEY IntelAssure software, installed on a security system server, automatically detects and tracks security IP infrastructure.

**ALERTS:** Each component and process is continuously polled. When a failure or vulnerability is identified, automatic alerts with specific solutions are sent.

**SYSTEM PERFORMANCE:** STANLEY IntelAssure also tracks and reports on system performance over time, as well as changes made to devices, processes, data flow, etc.

# Automate Results. Improve Performance.

## Service Assurance for Video Systems

STANLEY IntelAssure automatically detects and diagnoses issues with video systems. If there's a problem, you'll instantly receive a detailed alert that gives specific information on the root cause and solution. This puts your team in the best position to maintain service assurance of your video system while potentially eliminating up to 80% of the labor time and cost associated with detection and diagnosis.

## Sustainable Cyber Hygiene

IT departments are on full alert for physical security infrastructure that can be compromised by malware, denial of service attacks and other cyber-criminal activity. STANLEY IntelAssure delivers foundational steps towards a comprehensive cyber hygiene policy through:

- ▶ Automated Camera Firmware Updating
- ▶ Automated Camera Password Checking
- ▶ Automated Inventory Tracking and Reporting

## Audit Compliance Automation

STANLEY IntelAssure makes your approach to audit compliance tracking and reporting more efficient, automatically. Whether you're generating internal performance figures or adhering to mandated compliance benchmarks (such as Sarbanes-Oxley, PCI, SOC 2, etc.), you'll have the data and reports you need to succeed.

## Comprehensive Physical Security Coverage

Access Control Systems and IoT (Internet of Things) Devices offer their own complex set of challenges with multiple potential failure points. STANLEY IntelAssure can automatically detect, diagnose and document IP components while alerting to failures and vulnerabilities.

## Automate Your Service Assurance, Cyber Hygiene and Audit Compliance
