Embedded Security Services

Your On-Site Partner to Manage Your Security Operations

With today's complex and varied security needs the ability to mitigate the increased risk environment is key. STANLEY Security can provide part-time or full-time on-site embedded services for your business. A dedicated STANLEY employee located on-site allows for complete system management without the worry of staffing administrators or system specialists. These experienced specialists become more than a vendor, but a partner in your Security Program's success.

Embedded Services Can Include:

◥ Technical specialist

◥ Administrative specialist

◥ Project manager

◥ Application engineer

◥ Program manager

Solutions to Address Your Unique Challenges May Include:
