

# Federal Government Solutions

## Cost Effective Compliance

STANLEY Security, a GSA certified end-to-end solutions provider, has a dedicated Government team with security consultants, system architects and engineers specially trained and available to assist agencies with HSPD-12 compliance and system architecture. Our goal is to help design road maps for cost effective, non-proprietary, compliant security solutions that help reduce total cost of ownership across the Federal Government sector.

STANLEY's Government Team specializes in UL 2050, access control and video design, engineering, integration, installation, maintenance, monitoring and service. Our systems are designed to expand and adapt to ever changing government regulations.
